

...a diverse range of expertise in  
civil construction & project delivery...

## AVIATION

### Aircraft Pavement

West Coast Civil has built Hundreds of Thousands of Square Meters of Aircraft Pavement ranging from Code B to Code F Rigid and Flexible

We have Specialist knowledge in Flood Compaction and Marco Rolling

### Airfield Ground Lighting

West Coast Civil partnered ADB Safegate in delivering CAT III Operations to Perth Airport in 2018

We have also delivered Primary CCT Upgrades, Medium Intensity Systems and Precision Approach Instruments on our own to Regional Operators

### Security

West Coast Civil has completed Hundreds of Meters of Airside Fencing to the highest standard. We also have a maintenance team that responds 24/7 to Airside Gate Control

### Compliance

Having previously operated Aerodrome Compliance & Civil we have knowledge in Aerodrome/ Safety Manual MOS Compliance and ATI Inspections and Survey

## CIVIL

### Roads

West Coast Civil has completed Road Extension, Roundabout Construction and Intersection works for clients such as Perth Airport, Porter Consulting, The Shire of Leonora and Hanson Quarries

### Carparks

As a part of our Design and Construct skills WCC recently completed a Carpark Upgrade for Perth Airport at their new Field Maintenance Facility

### Sports Fields

West Coast Civil has been lucky enough to develop a Strong Relationship with HG Sports Turf in delivering subgrade / base preparation and subsurface drainage for Optus and Perth Hockey Stadiums

### Hardscapes

Having the skills to complete complex works flows with attention to detail. WCC has completed hardscape works packages at both Curtin University Thresholds and Perth Airport Terminal Forecourts. Works include paving, structures, access control and landscape designs

### Utilities

WCC hold the Hydraulic Maintenance Contract at Perth Airport, responsible for looking after all facets of Stormwater, Sewer, Water Reticulation and Gas services within the estate. We also have experience in Mechanical Piping through our previous venture Avmech. We have completed Aviation Fuel piping for AirBP and Chilled and Heated Ring Mains for Perth Airport

## DESIGN

[cdcengineering.com.au](http://cdcengineering.com.au)

Our Sister Company CDC Consulting has been our partner in the completion of over \$6m in Design and Construct Packages in 2017-18. Works included Carparks to Principal Shared Paths and Aircraft Apron Extensions

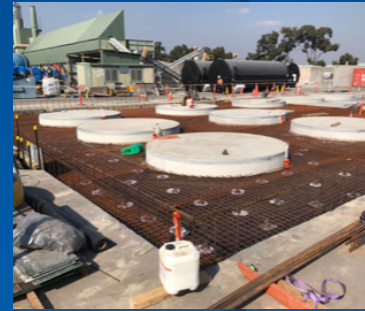

## BUILDING

Stemming from a need to self perform building works West Coast Civil obtained its Building License in 2016. We have since completed over \$10m in Building works

Projects completed include 1,100m2 of Office Space for Perth Airport completed in conjunction with Fleetwood and 3No. Lighting Equipment Rooms and Offices for the operation of Perth Airports CAT III Lighting System

West Coast Civil also has experience in managing demolition works and holds a Restricted Asbestos Disposal license

## MAINTENANCE

West Coast Civil is currently the main Civil Maintenance provider for Perth Airport completing works from Road Pavement, Signage Repairs, Hazard Removal and Response and Traffic Control

West Coast Civil is currently the Hydraulic Services Maintenance Contractor for Perth Airport which includes all Water, Sewer, Storm and Gas Services. We provide emergency response to service rupture and manage maintenance to 17No. Pump Stations

West Coast Civil also provides Perth Airport with Building Maintenance services ranging from Minor Handyman Repairs to Roof Resheets and Office Fit Out

All of our Maintenance Services are provided In house

West Coast Civil has a wide range of experience in dealing with Aerodrome, airside and landside construction including High Strength Pavement, Airfield Ground Lighting, Airport Car Park Construction, Intersection & Roundabout Modifications and Terminal Forecourt Upgrades. We also have extensive experience in other High Risk, Multi Stakeholder Environments such as Fuel Terminals, Port Facilities, University and Health campuses.

Formed in 2007 the company's success has been built on two foundations, long term partnerships with clients such as Perth Airport, ADB Safegate and BP (Air & Terminals) and our Staff who produce a standard of work that's hard to ignore. This long term approach sets the standard for achieving the right forms of project success with sustainable outcomes. We are proud of these relationships and they continue to drive our development.

The High Risk and Controlled Environments our teams continually work in need a dedicated and considered approach, being wholly WA and family owned the business is responsive enough to be able to achieve the standards of work and safety required to be the best. Our senior staff have a vested interest in the business, so all levels of management have the incentive they need to influence and maintain the right culture and commercial conduct.

We are also very proud of our OHS results with one Lost Time Injuries since beginning operations in 2007. We believe this is due to the high level of planning, communication and supervision attributed to each of our projects and the extensive preparation and implementation of safety plans, procedures & instructions on all works.

**We believe we will be able to offer excellent service, value for money and a personal approach to all work undertaken.**
